

A daily operating system for leadership

Connect funding choices with the everyday work of using resources well, resolving constraints and keeping commitments moving.

ONE CONNECTED LOOP

Evidence / judgment / commitment / observed outcome

Five main work areas, with separate organization setup in Admin. Decision DNA is inside Reference. Open supporting detail when you need it.

How information shapes a decision

Weaver connects records with organizational context, helps surface what matters, and keeps decisions linked to follow-through.

PERMISSIONS, EXACT VERSIONS AND INFORMATION FRESHNESS STAY ATTACHED THROUGHOUT

Source access and decision authority remain separate. Evidence, assumptions and uncertainty stay visible.

Results and corrections inform the next review. Changes to the organizational profile require human review.

Current demonstration: fictional records and controlled workflows. Live connectors and recurring learning require separate qualification.

Today

See your priorities before you search for them. The order combines your responsibilities with urgency and current workflow state.

1 Choose your perspective

Choose a recognizable role, then read the named contribution. The signed-in demo owner remains separate from the ten fictional staff.

2 Act on the ranked matter

Check Your status and Why now. Open my contribution goes directly to your output in the shared decision. Team activity is labeled separately.

3 Check changes and context

A saved contribution, completed review and active edit reservation are different states. Related team matters say when no deliverable is assigned to you.

WHY IT HELPS

Your two-minute scan becomes a practical next step.

CURRENT WORKSPACE · FICTIONAL RECORDS

Work

Carry one decision from preparation through independent review, human judgment and accepted follow-through.

1 Choose the work area

Decisions, Meetings and Commitments live here. Open Grants in the main navigation for opportunities and applications.

2 Prepare your named output

Your contribution leads the page. Expand Prepare your contribution, then Start editing. A short reservation protects that output; saving a note does not complete review.

3 Use supporting tools

Evidence requests, comparisons, briefs and approval requirements keep the selected decision and a Back button. Meetings and Commitments remain separate Work views.

WHY IT HELPS

The decision and the work it creates stay in one record.

CURRENT WORKSPACE · FICTIONAL RECORDS

Reports & analysis

Use the aggregate picture to find a material change, then follow it to the underlying work and sources.

- 1 Start with Overview**
 Scan the six management domains and the reporting period before drawing a conclusion.
- 2 Open a domain**
 Compare finance, funding, programs, people, marketing or strategy using like periods and definitions.
- 3 Inspect the source**
 Source and definition shows readable values and definitions. Technical identifiers are expandable. Back to the report preserves the selected month, program and trend window.

WHY IT HELPS

A report should point to a question leadership can act on.

CURRENT WORKSPACE · FICTIONAL RECORDS

Decision DNA

Read the organizational narrative first. The six lenses show how the covered evidence may shape current and future choices.

1 Read the whole story

Read the narrative above the six lenses. It connects recorded patterns to present decisions and future pressure points.

2 Compare six lenses

Color identifies the lens. The shaded band shows authored interpretive uncertainty, not statistical confidence.

3 Apply and challenge

Select a lens for its evidence. Apply the profile to a decision starts with a short implication; Explore context retains all lenses and contrary evidence.

WHY IT HELPS

Use the profile to ask better questions, never to rate a person.

NARRATIVE FIRST · SCROLL TO EXPLORE ALL SIX LENSES

Responsibilities and organization setup

Reference explains the organization. Admin maintains its approved setup.

- 1

Find the shared responsibilities

Reference has Documents & sources, Organization & decisions and Decision DNA. Open a decision to see its named contributors.
- 2

Maintain people and reporting

Use My signed-in account, then Admin. Select a person, preview their changes and review the roster draft before activation. Back returns to the people list.
- 3

Review approvals and data settings

Responsibilities & approvals opens one readable setup. Revise it explicitly. Data & AI settings explains each setting before its change form; Change history records prior changes.

WHY IT HELPS

Account keeps private preparation. Help holds guided examples and this guide.

Choose, prepare and strengthen the response

Open Grants in the main navigation. Assess, Prepare response and Review submission share one opportunity record.

1 Assess the opportunity

Compare mission fit, competitive position and application hours. Confirm capacity before assigning the work.

2 Prepare a credible response

Select Strengthen an established service (O01). Draft using current programs, captured data, reporting capability and approved voice.

3 Resolve what blocks readiness

Review Your next requirements first. Other team requirements remain expandable. A coverage score cannot clear missing attachments, hours, current reviews or human approval.

WHY IT HELPS

A high score can coexist with an incomplete package.

O01 / FICTIONAL \$180K CONTINUATION GRANT

The screenshot displays the Weaver Dynamics Nonprofit Workspace interface. On the left is a dark sidebar with the logo and navigation options: 'Development Direct' (selected), 'Aisha Robinson · Development Director · Explore work and responsibilities.', 'Today', 'Work', 'Grants' (highlighted), and 'Reports & analysis'. The main content area is titled 'Development | Fictional team perspective' and includes a 'User guide' link and a user profile for 'Aisha Robinson' with a 'Sign out' button. The primary section is 'Applicable decision policy', stating 'Funded program and grant response · Approval rule checked; package readiness is separate · version 1' and providing a link to 'View approval requirements for this decision'. Below this is the 'SUBMISSION QUALITY' section, which includes a 'Review the weaknesses that matter.' prompt, a status 'Not ready · 3 mandatory items', and a narrative coverage score of '90 / 100'. A note indicates 'A separate check against the published fictional rubric. Current organizational fit remains in Assess.' The 'Your next requirements' list includes: 1. Aisha Robinson · Attach Full-cost worksheet (Affected section: Full-cost worksheet), 2. Aisha Robinson · Attach Six-month delivery schedule and readiness declaration (Affected section: Six-month delivery schedule and readiness declaration), 3. Aisha Robinson · Attach One-page closure plan (Affected section: One-page closure plan), and 4. Aisha Robinson · Confirm protected effort and resolve any shortfall.

O01 demonstrates full drafting and review. O02 and O03 retain assessment and capacity planning. O03 is the revised 30-place branch; linked Work retains the original 40-place proposal. Scores are not award odds.
